## WE CAN DO IT ALL !!

Disc jockeys that take control of the audience and play the best music that is ALLOWED in school.

Thumping Sound Systems equalized and processed -- designed to fill a small room to the largest field house.

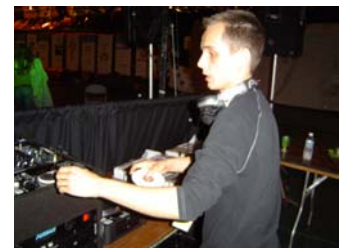

Intelligent light shows that can scan rooms, change colors, move patterns while respecting the permission of the use of fog.

Music Video Screens that show the latest videos and best simulcast (your students).

Sing-A-Song karaoke with the latest songs. Video tapes and audio cassettes of performances also available.

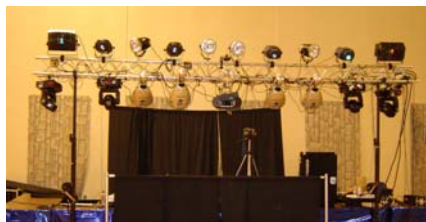

Awesome Game Shows Can be specially produced through our popular sister company game show gurus.

Remarkable extra entertainment for para-dance activities either at lunch or other activities.

**What about cost?** Students these days grow up in a multi media high tech world. They go to concerts where over there is over a million dollars in lights, sound, and video. They watch MTV with high tech lights and sound. Too often schools skimp on the DJ over favors or decorations. It is always wise to spend a little more on the DJ and book the necessary package to accommodate the group expected. Students will easily pay more for the minimal cost increase per person. Remember, movie tickets for two without concessions are \$20 per couple. Great America without concessions or food is \$80 per couple. Dinner at Fridays is easily \$20 per couple

## See. Hear. Experience.

We live in a multi media world. MTV is older than most of the students in school these days. Video screens add a grandiose effect while adding another dimension to your event.

Imagine being able to see the action of your event come alive on one or two large screen video projectors. Imagine a video montage created by our computer video editing system showing pictures of your school, class, or special guests. Our cameras can catch guests dancing as we add comic captions with our titler. Imagine standard music videos (edited/clean) played on DVD machines that everyone enjoys, along with computer animation, and silent backgrounds being broadcast during other dancing.

Now imagine your guests being able to see themselves on the big screen in a television production about Y.O.U. All of this incredible showmanship is controlled by our high-tech special effects generator that creates hundreds of patterns and special effects with video. Of course we can play back any special presentations created by an outside studio or your school's AV department.

We are professionals. We started our careers on high school and college programming boards. We use only professional flight cased equipment, subscription music on CD and now MP3, are fully insured. Our staff always dresses appropriately, and arrives with sufficient time to set up. Set up time varies by package but can be anywhere from one hour to four hours.
